

Screen surface – Polar GS

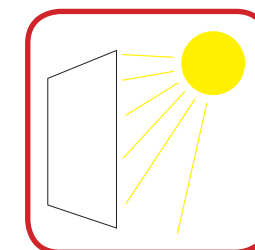

material	Polyester fabric with PVC coating, white on the front, black on the back
type	Projection surface according to DIN 19045 type D Fabric-based image panel, standard with a black, light-tight back coating, screen wall surface provides excellent Projection results up to a viewing angle of 45 ° left and right of the projection axis
grammage	800 g/m ²
material thickness	0,7 mm
fire behavior	meets the requirements of DIN 4102 – B1
luminance factor	1,1
weldable	Yes
delivery	rolled

contains PVC

flame retardant
after DIN 4102 B1

lightproof
